

Please, Do not further homogenize our media access to information! If there is one thing that all people should understand, it is that knowledge of all sides of local, state, national, and international issues are necessary to make an informed decision. Allowing corporate monopolization of the media can take away our ability to make well informed decisions in one swift blow. Please, do not take action in ways that will negatively affect not just some, but all the peoples of this nation. We need diverse media perspectives.

Thank you for your time and effort,  
Joseph Schueler
